

Hope Pro 2 hubs £170 per pair

→ **Contact** www.hopegb.com

Hope and its hubs have earned a deservedly excellent reputation over the years, and the current Pro II model offers great performance, reliability and futureproof versatility.

With seals designed to cope in the super-hostile local conditions of the Lancashire Dales, these hubs are about as UK-proof as you'll get. They're easy to pull apart and service, or swap bearings by hand when you need to, and Hope's product back-up is legendary for going well beyond the call of duty.

Easy axle switch-outs front and rear make them increasingly useful as front and rear axle standards proliferate. The Pro III versions drop weight and add

stainless bearings, too. All in all, a great centre to any trail wheel.

Verdict

Robust and reliable with unique versatility and excellent pricing.
