

6 BOLT ROTORS

For 6 Bolt rotors, STD or Floating, compatible with all Hope Technology 6 Bolt rotors.

Available sizes:

R24mm - HBSP4536

R32mm - HBSP437

CENTER LOCK ROTORS

For Center Lock rotors, floating, compatible with all Hope Technology Center Lock rotors

Available sizes:

R24mm - HBSP449:24

R32mm - HBSP449:32

001_ Please check the distance **R** from centre of disc, must be within **2mm** from what it is on your bike.

002_ Please check the bike frame clearance, the speed sensor thickness is **3.5mm** and sits on the front face of your disc. Therefore you need at least **4.5mm of clearance**.

CAUTION:

E-Bike manufacturers are using a vast variety of magnets to interact with the sensor. These magnets can vary a lot in size, shape and generated magnetic field. Being impossible to test every E-Bike on the market, despite the effort to make the magnet compatible with most bikes we can't guaranty it will work on every bike.

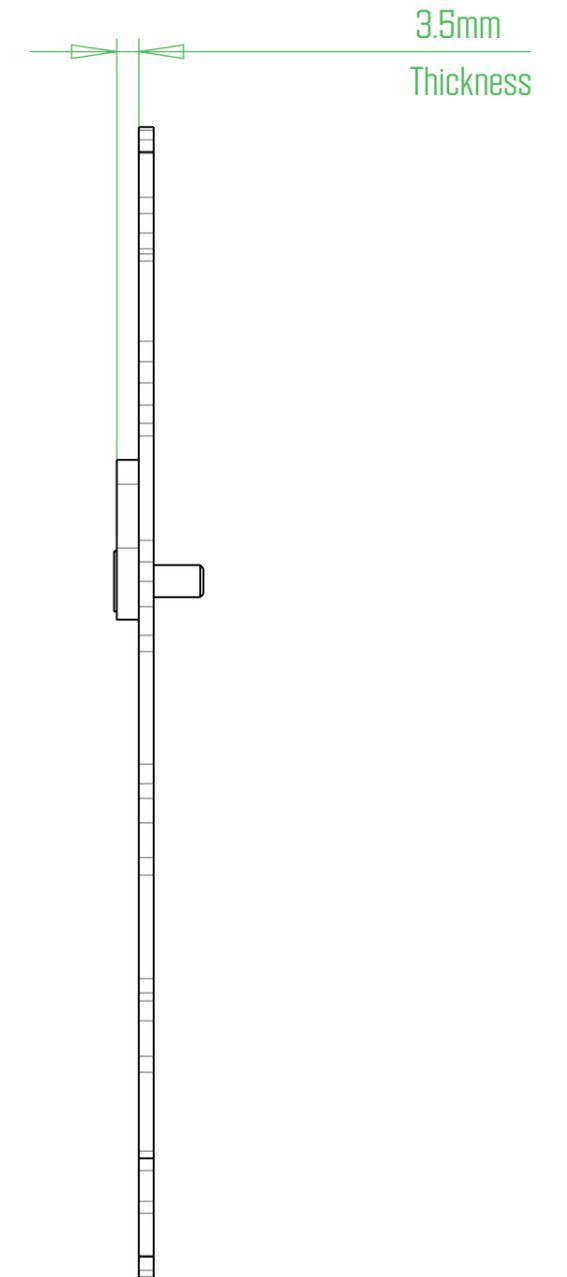

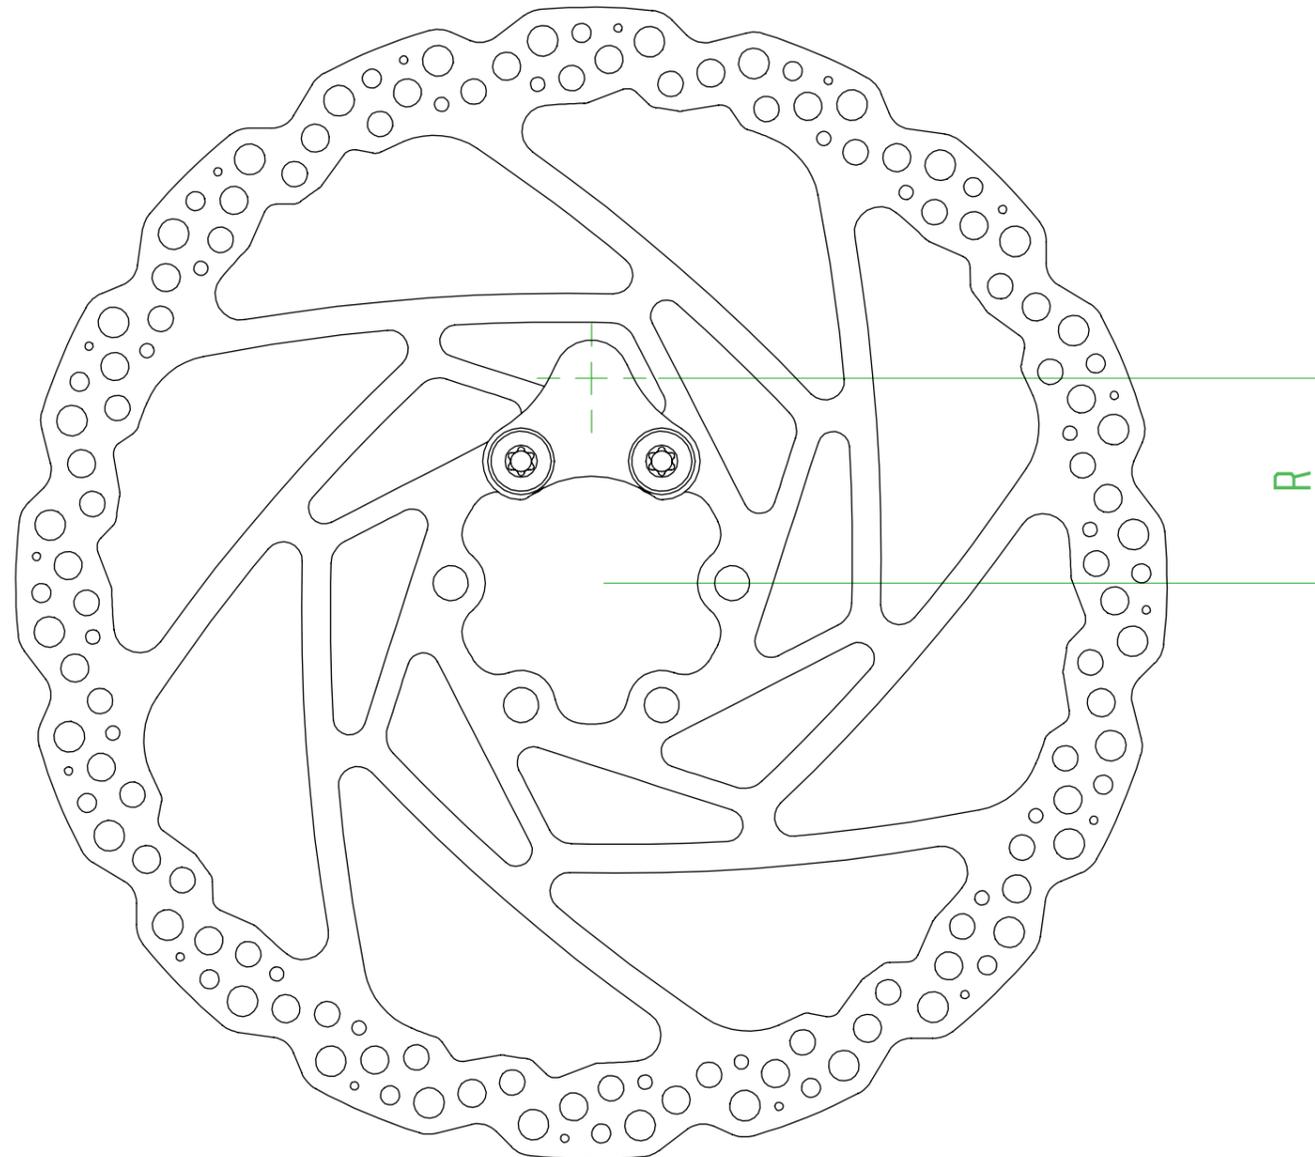

Illustration showing 6B type disc.
Proceed with same measurement if using Center Lock
